**Forren, John [7:48 AM]:**

Has my invitation to others for Kathy's briefing caused some controversy?

**Passmore, Margaret [7:49 AM]:**

I think it would have been helpful for it to be a smaller group so we could strategize a little, but we can just do that this pm.

**Forren, John [7:49 AM]:**

I didn't think this was going to be a strategy session but a briefing.

As I told Amy, I think this presentation will be impactful as this adverse effect isn't some abstract concept but an all too tangible one. I think it's important for others to hear about this, especially directly from the principal involved.

**Forren, John [7:24 AM]:**

Hey Mags. We can send comments without review up the chain. I thought Craynon mentioned Joy because he would send entire PPT. I agree Joy should not be in the middle future exchanges. I'm available if you want to chat by phone or video.

**Passmore, Margaret [7:25 AM]:**

that's fine. emailing back and forth with Susan now - appears I misunderstood her and she would provide us with a few points that we could include in our response back to Dr. C.

**Forren, John [7:26 AM]:**

Then I misunderstood too. Thought hers would be separate.

**Forren, John [7:40 AM]:**

I'd like to provide your comments to Matt Klasen in HQ, not to review prior to release but to educate him on the issue. I emailed yesterday about the points we were trying to make with Craynon's work and he said the same thing came up during the HQ webinar with Craynon. Evidently during that webinar, Craynon indicated that it's too late to change his conductivity paper in the symposium proceedings as it went to press.

**Forren, John [8:02 AM]:**

Mags -- could you send me Sue C's response to the Va Tech work? I only have a copy of her email to Greg. Thanks.

**Forren, John [2:30 PM]:**

You were doing a lot of eye rolling this morning, Mags. Sorry you seemed so disappointed.

**Passmore, Margaret [2:35 PM]:**

(b)(6) Personal privacy . I was not doing any eye rolling. I was honest about how I felt about the retreat. If there is no clear purpose or goal that requires all of OMA in one place for two days, it's a waste of time and resources in my opinion. I like the idea of ongoing meetings to explore collaborative projects that are substantive.

**Forren, John [7:47 AM]:**

Mags -- would you mind sharing the email you received from Greg about instructing you to undertake certain tasks? It would remain in the strictest of confidence.

**Passmore, Margaret [7:48 AM]:**

it was in the chain regarding the comments to Cranyon. you saw it last week. I don't want to make a big deal out of this particular instance. It's more about how work assignments are distributed on the team in general.

**Forren, John [7:49 AM]:**

Ok -- I'll take a look. I didn't look down through the email string.

I want to be sensitive to the distribution of work assignments. I'd like to chat with you sometime today about it if you don't mind.

**Passmore, Margaret [8:22 AM]:**

today will be tough. how about early tomorrow am

**Forren, John [8:28 AM]:**

Okay.
